Radox	Jason Webster	02894 343 103	https://www.radox.com/	Jason.Webster@RadoxHealth.com
<p>1. Tests can be purchased at any time so they are ready and waiting as there are no storage requirements - just keep them out of direct sunlight and kept at room temperature. 2. There is no minimum order. 3. The test is highly sensitive and can detect the virus 2 days before symptoms appear and several weeks after if anyone is a 'super carrier' who shows no symptoms. 4. Home kits can be posted out or (by prior arrangement) collected 5. Sent directly to the production personnel to be tested. 6. Tests can be returned by post or directly. 7. Results 3-5 days</p> <p style="text-align: center;">Testing Machine: Vivalytic Machines , Price: £35,000 , Turnaround Time: 3 hrs , Test Kits Price: £1,350 for 15</p>				
Scottish Nursing Guild (NI Office)	Lorna Braniff	02895 903487	https://scottish-nursing-guild.com/	Lorna.Braniff@nursingguild.com
<p>Rapid antibody point of care testing* – this in-vitro diagnostic test only takes a few minutes to perform and return results under the supervision of a medical practitioner. This assesses if you are carrying the virus or if you have been exposed to the virus in the recent past. Least invasive, most practical and most cost-effective. Antigen swab testing (PCR) - swabs must be carried out by a trained person, or it can be monitored by a trained person, to make sure the swab is being inserted correctly. This assesses if you currently have the virus. The samples are analysed in a laboratory and results are usually back within 48 hours. This is the best solution they can offer to organisations specifically requiring regular PCR gold standard swab testing.</p> <p>High sensitivity & specificity antibody testing - bloods are taken venously by a medical practitioner. This assesses if you have been exposed to the virus in the recent past. The samples are analysed in a laboratory and results are usually back within 48 hours. This is the best in class commercial antibody test available, with less room for error given this is a full blood draw.</p>				
MKB Medical	Mark Bailie	028 9048 4673 / 07779 924 696	https://mkbmedical.com/	mark@mkbmedical.com
